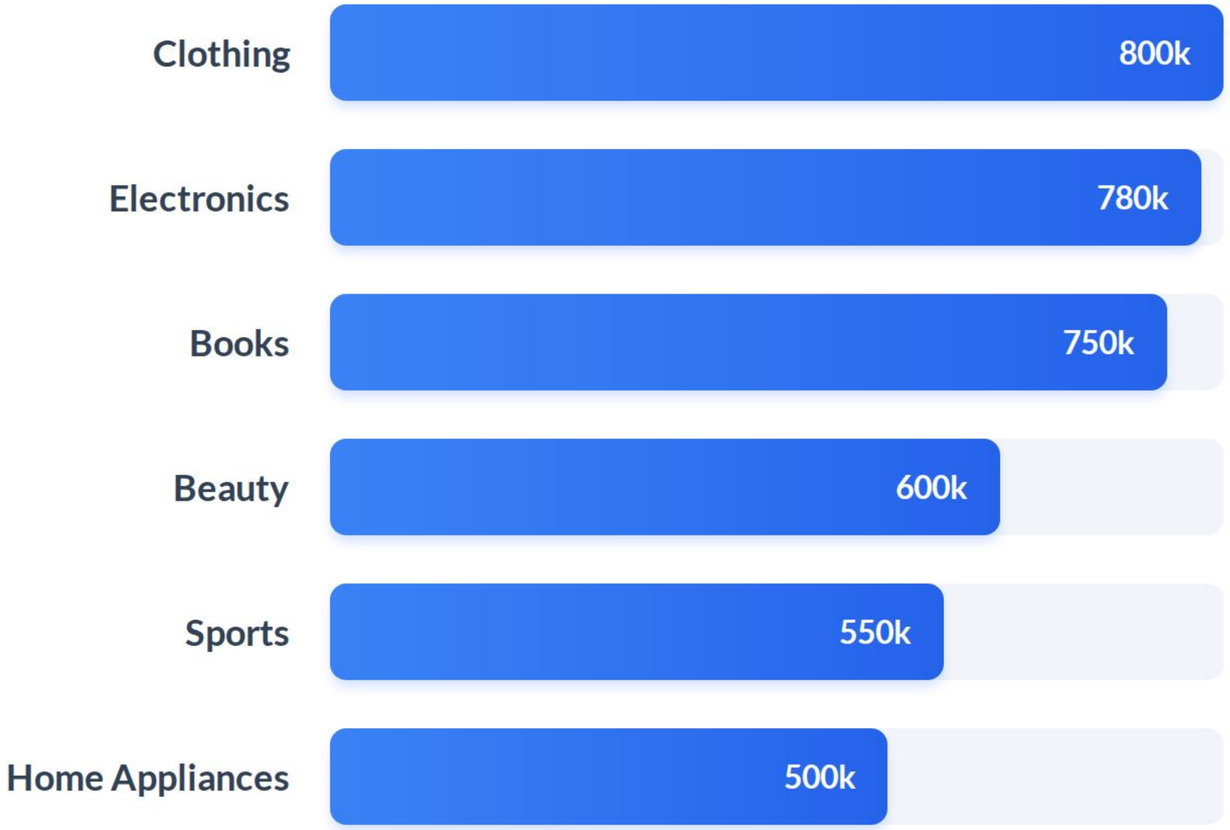
Strategic Insight

High average order value indicates successful upselling tactics across the primary tech and clothing segments.

Revenue by Category



Revenue Concentration

Clothing and Electronics dominate the product portfolio, capturing the largest segment of overall revenue and serving as primary growth drivers.

Untapped Potential

Categories like Home Appliances and Sports currently underperform, presenting strategic opportunities for targeted promotions and cross-selling.

Monthly Sales Trend (2024)

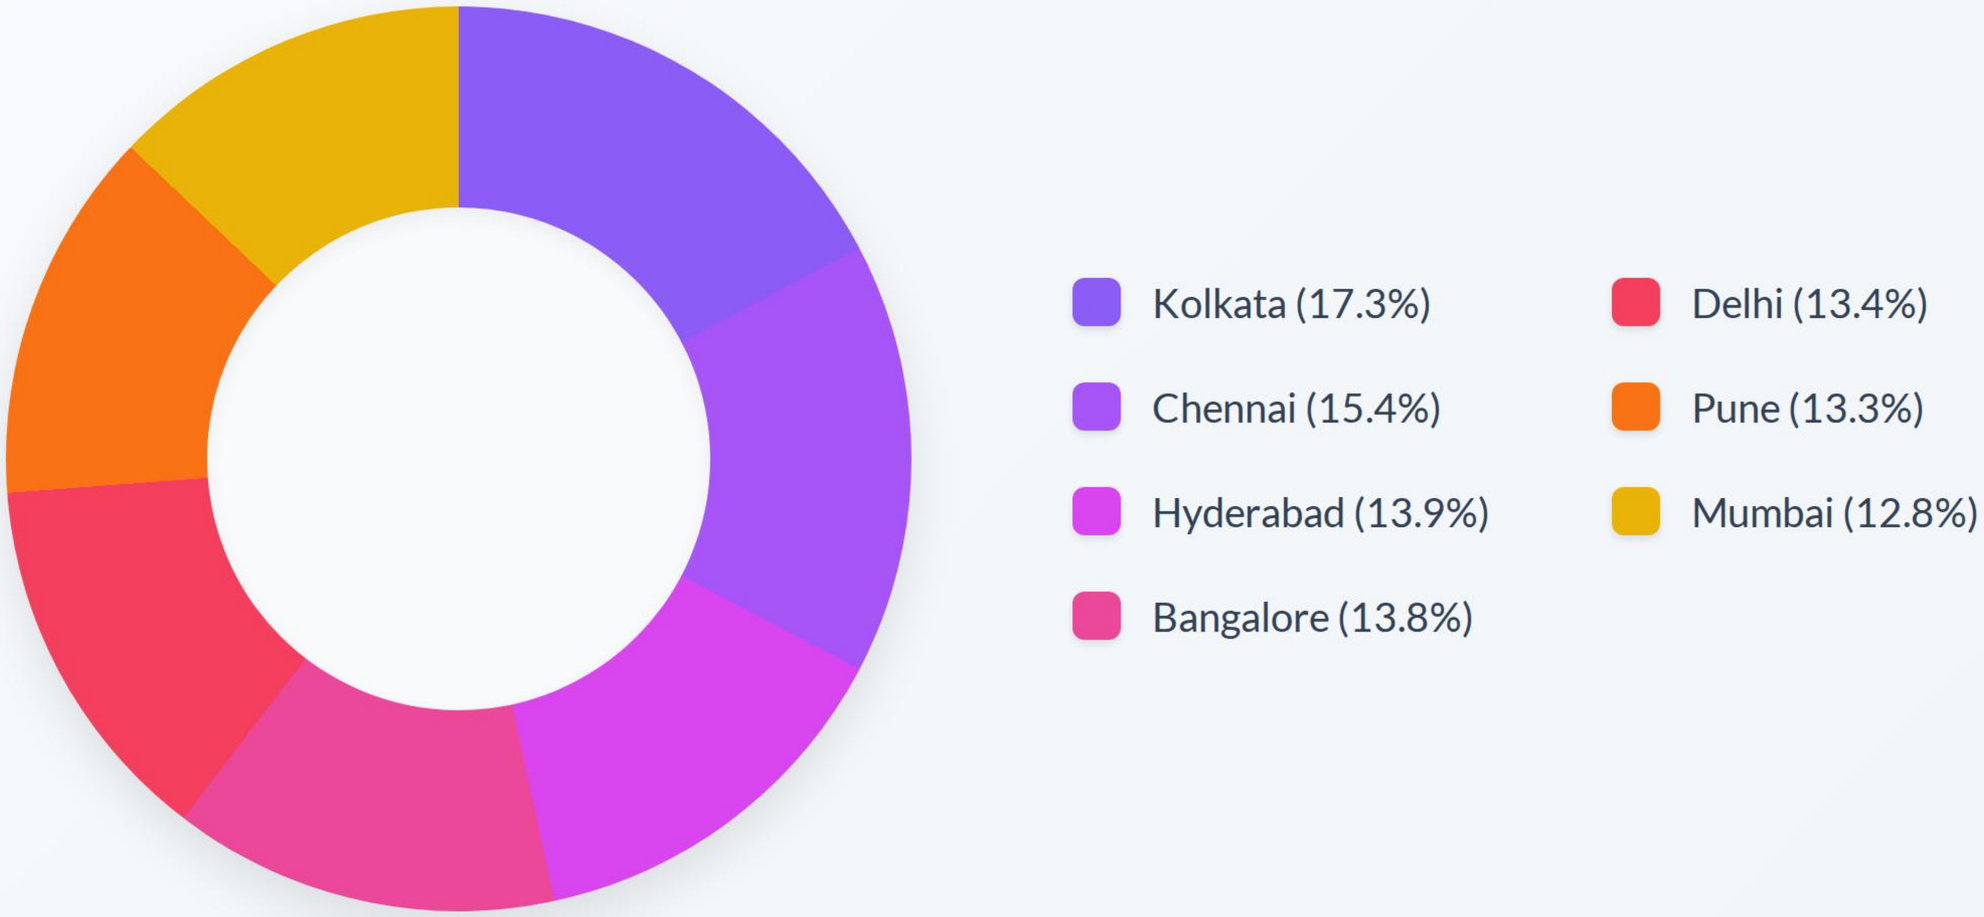
❄️ Holiday Seasonality Spike

Revenue experiences a massive surge in December, strongly indicating that Q4 holiday shopping is the most critical period.

Q1 Revenue Slump

Following the holiday peak, sales drop significantly early in the year, highlighting a need for off-season retention strategies.

Sales by City



Geographic Stability: The revenue spread across all listed cities is exceptionally balanced, mitigating the risk of over-reliance on any single local economy.

Top 5 Products

Unexpected Top Performer

The "Novel" emerges as the highest-grossing individual item, surprisingly outperforming traditional high-ticket items like Laptops and Smartphones.

Portfolio Diversity

The presence of literature, sports equipment, and electronics in the top 5 indicates a highly diverse customer demographic with varied purchasing behaviors.
